RIPE NCC Report

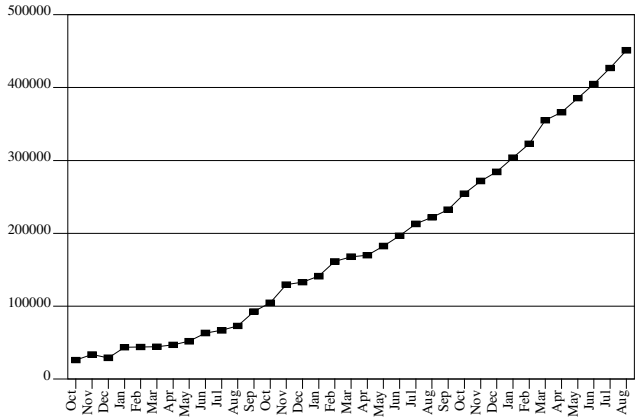
Daniel Karrenberg

RIPE NCC

Internet Hosts

- 20 - 25% of Internet Hosts

RIPE DNS Hostcount History 1990-1993



Overview

- registry
- document store
- new database software
- 2 projects completed, one started
- outlook

Registry

- business as usual
- 193.x.y delegation success
- started using 194.x.y
  - no large blocks left in 193.x.y
  - will reserve less in 194.x.y
- Please use common registry template!
- new leaflet availabe (green)

Database Software

---> Marten

Document Store

- WWW operational
  - try Xmosaic!
- Gopher structure being revised
- general revision of deocument store starts
- input to Anne please!

Projects

- GISS concluded successfully
- Route Server concluded successfully
- PRIDE
  - defined
  - funded
  - started

-----> Tony (later)

Odds and Ends

- hostcount, produces nice diagnostic output!
- presentations at JENC, IETF, Regional Techs, EUnet DE
- conference support: IETF, RIPE, Interop Shownet
- database alignment still pending on InterNIC
- ECHO gateway stopped

Hostcount -> Orgcount

Country	Domains	"IP"	MX only
UK	1012	407	605
DE	665	260	405
SE	564	128	463
FR	444	259	185
NL	394	82	312
...			
AL	1	0	1
Europe	6026	2421	3605

Outlook

- pride project started
- one more staff being hired for it
- positions for 6 month projects available

- populating the routing registry is next!

Very Important

- Funding for core activities in 1994
  not complete!

  - budget 260,000 ECU

  - about 100,000 ECU short!

Conclusion

It is still fun!
