The 'tfrupee' package

Palle Jørgensen

4th August 2010

1 Introdction

This is the contents of the 'README' file.

The 'frupee' package provides LaTeX support for the Rupee symbol created by TechFat, http://techfat.blogspot.com/

The font is transformed into Type 1 format using FontForge.

The LaTeX support is created by Palle Jorgensen, hamselv(a)pallej.dk.

2 Loading the package

Install the package and fonts and type

`\usepackage{tfrupee}`

3 The Rupee symbol

Once the package is loaded type

`\rupee`

to acces the symbol.

Look the the pages of TUG for information on installing fonst on your system, eg. http://www.tug.org/fonts/fontinstall.html.

4 License

The license of the font and the LaTeX support files is GPL. View the file "LICENSE" for details.
